## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed on 10/20/2008, with respect to claim 49 has been considered but are moot in view of the new ground(s) of rejection.
2. Applicant's arguments, filed on 10/20/2008, with respect to the rejection(s) of claim(s) claims 23, 24, 26, 27, 34, 35, 37-39 and 44-48 under 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 49 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

- With regard claim 49, the limitation of "A computer-readable medium" as recited has not been taught in the specification at the time the application was filed.

### ***Allowable Subject Matter***

5. Claims 23, 24, 26, 27, 34, 35, 37-39 and 44-48 are allowed.
6. The following is an examiner's statement of reasons for allowance.

- The prior art fails to teach an apparatus of Claims 23, 26, 34, 37, 44 and 46 that specifically comprises the following:

-- The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. WO 00/31889, US 5,818,882, US 6,381,234, 6,598,198 and US 6,754,290. The improvement comprises:

With regard claim 23, 34 and 44, “wherein the number of said plurality of portions of data symbols is based on a data rate of data symbols of said frame of data.” as recited in combination with other limitation as claimed in Claims 23, 34 and 44, respectively.

With regard claim 26, 37 and 46, “wherein the number of said plurality of channel elements assigned to each frame of data is based on a data rate of the data symbols in each of said plurality of frames of data.” as recited in combination with other limitation as claimed in Claims 26, 37 and 46, respectively.
